

# TORCHES

## MINOR BENCH BURNER

Catalog # NOR-MB

"MINOR" BENCH BURNER Specifically designed for glass artistry. Has adjustable control knobs for full control over flame size and richness. For use with propane or natural gas along with oxygen. Burns hotter than non oxygen mix torches.

## MIDRANGE BURNER

Catalog # NOR-MRB

Surface Mix Burner, to be used with either Propane and Oxygen or Natural Gas and Oxygen. Burner has adjustable control knobs for full control over flame size and richness.

## HOT HEAD TORCH

Catalog # HHT

Glass Bead making Torch specially designed for the glass bead hobby. For use with mapp gas.

## WORK SURFACE WITH HOLDER

Catalog # SSGH

Combination gas bottle holder and work surface. Work Surface measures 9"X16" made of stainless steel.

# TORCH ACCESSORIES

## STAINLESS STEEL WORK SURFACES . 24 GAUGE

Catalog # SS12	12" x 12"
Catalog # SS1224	12" x 24"
Catalog # SS18	18" x 18"
Catalog # SS1824	18" x 24"
Catalog # SS24	24" x 24"

## DIDYMIUM SPECTACLES

Catalog # 4011DID

A must for protecting your eyes from bright sodium flare, ultra violet and infra red rays while working with glass in a torch.

# TORCH ACCESSORIES

## TORCH MOUNTED MARVER

Catalog # HHTM ( For hot head torch ( HHT )  
 Catalog # NOR-MBM  
 (For "minor" burner (NOR MBM)

Marvering pad mounts to torch near the flame. 2 lips located on the marver are used to hold small items and to preheat millefiori.

## TORCH REGULATORS AND HOSE

Catalog # BD-HOSE 12' Torch hose  
 Catalog # BD-REG-O Torch regulator (Oxygen)  
 Catalog #BD-REG-P Torch regulator (Propane)

Twin lead flexible tubing. Grade T rated for all types of fuel gases and oxygen. Propane will eventually rot standard grade R welding hose. Longer hoses available. Please specify which torch you have. A 5/16" or 3/8" BB hose set is recommended when connecting large manifolds to regulators.

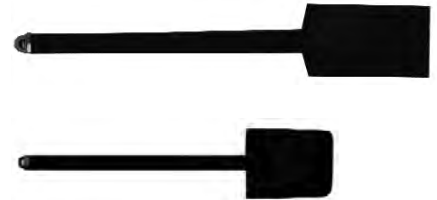

Torch Regulator (Oxygen)- BD-REG-O

# GRAPHITE PADDLES, PADS & MOLDS

## GRAPHITE PADDLES

Catalog # GP15 1 1/2" x 1 1/2"  
 Catalog # GP152 1 1/2" x 2"  
 Catalog # GP1525 1 1/2" x 2 1/2"  
 Catalog # GP2 2"  
 Catalog # GP215 2" x 1 1/2"  
 Catalog # GP23 2" x 3"  
 Catalog # GP2515 2 1/2" x 1 1/2"  
 Catalog # GP3 3"  
 Catalog # GP32 3" x 2"  
 Catalog # GPS Shaping Paddle  
 Catalog # GP225 Graphite Paddle 2" X 2 1/2"

High quality graphite paddles have an approximate 6 1/2" handle colored with a high temperature rubber cover. Measurements are width by height.

## GRAPHITE MARVERING PAD

Catalog # GP5 5" x 5"  
 Catalog # GP6 6" x 6"

High quality graphite work surface for marvering. Also can be used as a kiln shelf which does not require kiln wash.

## GROOVED MARVERING PAD

Catalog # BD-M 2" x 4"

Aluminum grounded surface.

## GRAPHITE MOLDS

Catalog # GP3812 3/8" and 1/2"  
 Catalog # GP5834 5/8" and 3/4"  
 Catalog # GP781 7/8" and 1"  
 Catalog # GP114 1 1/4"  
 Catalog # GP112 1 1/2"

Beads and marble molds have a half cylinder and half sphere pattern for each size except for large GP112 and GP114 which have only half sphere.

# BEADING TOOLS

## CARBON RODS

Catalog # BD-CR316	3/16"
Catalog # BD-CR14	1/4"
Catalog # BD-CR38	3/8"
Catalog # BD-CR12	1/2"
Catalog # BD-CR34	3/4"
Catalog # BD-CR1	1"

Used as reamers, shapers, polishers, holders, marvels, etc. Can be sharpened like a pencil or carved on to press patterns into hot glass. 12" long.

## BEAD MANDRELS

Catalog # BM1169	1/16" x 9" LONG
Catalog # BM1169 B	1/16" x 9" ( with brass handle )
Catalog # BM11612	1/16" x 12" LONG
Catalog # BM3329	3/32" x 9" LONG
Catalog # BM33212	3/32" x 12" LONG
Catalog # BM1812	1/8" x 12" LONG

Stainless steel rods with nicely pressed rounded ends. Sold by the dozens. BM-1169B has a brass sheath that covers two thirds of the handle. Large diameter is easier to hold and is more ridged.

## TUNGSTON RODS

Catalog # BD-TR116	1/16"
Catalog # BD-TR332	3/32"
Catalog # BD-TR18	1/8"

7" long rods best used with BMV pin vise to use as a rake . Both ends are ground to points. One end is long taper with other a short taper.

## SLUDGE PLUS

Catalog # BMS ( 3/4 LB. )
Catalog # BMS3 ( 3 LB. )

Coating for mandrels so bead will not stick to mandrel even on beads taking two hours to make.

## MANDREL ROD REST

Catalog # BMR

Holds 10 rods and/or tools 7 1/2" long.

## MANDREL TAIL STOCK HOLDER

Catalog # BMTSH

Wooden handle at one end with a brass rod with cup shape on opposite end. To be used with tail stock in one hand and manral in other to steady bead.

## MANDREL PIN VISE

Catalog # BMV

3 Jaw chuck mounted on wood handle. For use with Rods up to 5/16" in diameter.

## BEAD BLANKET

Catalog # BD-CM

Place your beads between these thick ceramic fiber blankets after flame annealing to help reduce thermal shock. Size 6" x 12".

## BEAD FINGERS

Catalog # BD-FS ( small )
Catalog # BD-FM ( medium )
Catalog # BD-FL ( large )

"Hot fingers", a sliding collar closes stainless steel fingers. Small is ideal for buttons, medium is for marbles up to 1 1/2" and large is for small goblets.

## BEAD CLEANING BRUSH

Catalog # BD-CB

Double ended brush ideal for cleaning mandrel release from any bead hole which is 3/32" and larger.

**SHAPING TOOL**

*Catalog # BD-ST*

Handle with four sided stainless steel tip to shape with.

**FLARING TOOL**

*Catalog # BD-FT*

A triangular shaped stainless steel wedge mounted in a handle used to flare holes.

**DIAMOND DRESSER**

*Catalog # BD-HD*

Handle with rod with small ball shaped diamond coated end. Rotate ball in hole under water to remove sharp string cutting edges.

*Catalog # BD-HF*

**DIAMOND HOLE FILE**

The best bead hole cleaner. Fine diamonds cover half the length of the 5 1/2" rod. Works on holes 1/16" or larger.

*Catalog # BD-HR*

**HOLE REAMER**

Carbide particles fused on to a wire with a handle. Works on holes 3/32" or larger.

**CLEANING WIRE**

*Catalog # BD-HW*

Spiral cut wire mounted in handle. Abrasive cleaning action will remove mandrel release in holes 1/16" or larger.

**7" STRAIGHT TWEEZERS**

*Catalog # BD-TPS*

Ideal for placing small items on your hot beads.

**7" CURVED TWEEZERS**

*Catalog # BD-TPC*

**3 PC. TWEEZER SET**

*Catalog # BD-TS*

Contains one each. 6", 8" and 12" Blunt end tweezers for pinching off unwanted bubbles & scum or handling hot sculptural beads.

**SMALL SHEARS**

*Catalog # BD-SHS*

**LARGE SHEARS**

*Catalog # BD-SHL*

Shears for cutting hot soft glass . Small shears are 6" overall with 2" blades while large are 7 3/4" overall with 2 1/2" blades.

### BEAD RAKE

Catalog # *BD-RW*

Tungsten bent rake 3/32" diameter rod mounted in a wooden handle. Excellent tool for raking and sculpting.

### BEAD RAKE

Catalog # *BD-R*

Stainless steel rake. Straight one end for poking and bent on the other end for raking.

### TUNGSTEN RAKES

Catalog # *BD-RT116*

1/16" DIAMETER

Catalog # *BD-RT332*

3/32" DIAMETER

Catalog # *BD-RT18*

1/8" DIAMETER

Available in three diameters these Tungsten rods are mounted in a wooden handle for poking and making holes.

## BEAD PLIERS

### STANDARD MASHING PLIERS

Catalog # *BD-PF*

FLAT SMOOTH

Catalog # *BD-PFL*

FLAT LEAF

Catalog # *BD-PAL*

ANGLED LEAF

*BD-PF*

*BD-PAL*

*BD-PFL*

*BD-PPF*

### PARALLEL ACTION MASHING PLIERS

FLAT LEAF

## MICROWAVE KILNS

### MICROWAVE KILNS

Catalog # *MK-S*

Small 3" I.D.

Catalog # *MK-M*

Medium 4 1/2" I.D.

An excellent kiln for jewelry pieces or just for testing compatability. The smaller size fires glass in about 5 minutes while the larger size takes about 8-10 minutes. Requires shelf paper to prevent glass from sticking to kiln.

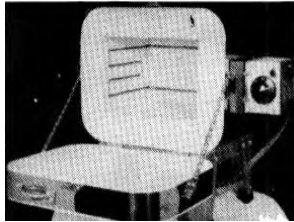

# EVENHEAT 110v GLASS KILNS

## KILN PRICING FOB CASEVILLE, MI

### JR. COPPER KILN

Catalog # EH-JC

Catalog # EH-JC-STP

An excellent kiln for testing, teaching and beginners. The front loading design makes raking and manipulation easy. Infinite switch control is standard. Operates on 120V, 12 amps. Inside dimensions are 10" wide x 6 1/2" long x 9" deep. Also available with STP computer controller.

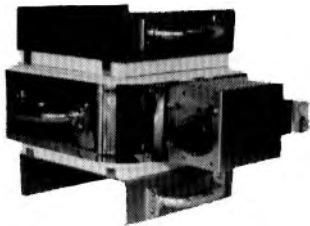

### HOT BOX KILN

Catalog # EH-HB (120 volt 12 amps)

Catalog # EH-HB-220 (220 volt )

### STUDIO 8 KILN

Catalog # EH-ST8 (120 volt 12 amps)

The Hot Box is a handy little kiln for those doing fusing, slumping and manipulation. Its rugged construction and ease of use make it very user friendly. Pyrometer is standard on all units. Inside dimensions are 6" wide x 6" long x 4 1/2" deep and has a viewing window. The STUDIO 8 kiln is the same as the HOT BOX, just bigger. The firing chamber is measures 8 x 8 x 4 1/2" and it has a viewing window in the top.

### STUDIO PRO KILN

Catalog # EH-SP (120 volt 12 amps)

Catalog # EH-SP-DP with digital pyrometer.

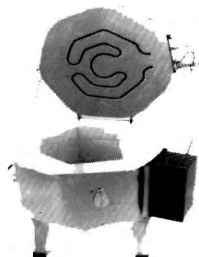

The STUDIO PRO kiln is the same as the STUDIO-8 kiln Except the lid is hinged to the main firing chamber, and the firing chamber is hinged to the base, this allows you to load the kiln without having the chamber walls in the way. It also allows you to open the top easily for venting. The firing chamber is measures 8 x 8 x 4 1/2" and it has a viewing window in the top. Analog pyrometer is included. Digital pyrometer is available at an extra cost.

### HOT SHOT KILN

Catalog # EH-GT14-6

Catalog # EH-GT14-6RM ( with built-in-rampmaster)

Catalog #EH-HS Hot Shot (w/ STP controller)

The GT 14-6 & HOT SHOT kiln combines the space and performance of a large kiln with the convenience of 120 volt 15 amp operation. This hot little unit is very capable and offers the user complete flexibility. Heating elements are configured in a top firing design with infinite control switch standard. A wonderful kiln for the serious beginner. Inside dimensions are 14 1/2" wide x 6 1/2" deep.

# EVENHEAT 220v GLASS KILNS

## KILN PRICING FOB CASEVILLE, MI

### RECTANGULAR KILN

Catalog # EH-GT4050 (With built-in STP controller)

The GT4050 is favored for its ability to reach temperature easily, the GT4050 performs well in any glass situation. The GT4050 is capable of all glass firing techniques up to 1650F, including fusing slumping painting & casting. Standard equipped with Set-Pro controller. Inside dimensions are 19 3/4" w x 15 3/4" d x 6 1/2" d. 15 amps, 240v.

### OCTAGON KILN

Catalog # EH-GTS18-9

Catalog # EH-GTS18-9RM (With built-in Ramp Master)

The GTS 18-9 was designed with the artist and small studio in mind. Its size lends itself well to the individual and is suited for all styles of hot glass work. Heating elements are configured in a top and side firing design for complete control of all kiln forming operations. Infinite control switches are standard. Inside dimensions are 17 1/2" wide x 9" deep. 27 amps and 240 or 208 volts please specify.

### TEN SIDED KILN

Catalog # EH-GTS23-9

Catalog # EH-GTS23-9RM (With built-in Ramp Master)

Catalog # EH-GTS23-13

Catalog # EH-GTS23-13RM (With built-in Ramp Master)

The GTS 23-9 is an absolute necessity for the busy artist, studio and production operation. Its size and versatility enable the user to explore all facets of hot glass work, from fusing and slumping to painting and pate de verre without restriction. Standard controls consists of infinite switches. All elements independently operated. Inside dimensions are 23 1/2" wide x 9" deep. 30 amps and 240 volts or 208 volts please specify. Also available 13' deep.

### WIDE TOP LOADING KILN

Catalog # EH-GTS2541

Catalog # EH-GTS2541RM (With built-in Ramp Master)

Catalog # EH-GTS2541-13

Catalog # EH-GTS2541-13RM (With built-in Ramp Master)

The largest of the top loading kilns, the GTS 2541 offers performance with increased size for the busy studio and production operation. Designed primarily for fusing and slumping, the GTS25451 can easily handle other glass techniques as well. Heating elements are configured in a top and side firing design with all elements being independently controlled. Inside dimensions are 41" wide x 25 1/2" long x 9" deep. 40 amps and 240 volts or 208 volts please specify. Also available 13" deep.

# EVENHEAT GLASS KILNS

## KILN PRICING FOB CASEVILLE, MI

### FRONT LOADING KILN

Catalog # EH-GT22

Catalog # EH-GT22RM ( With built-in  
ramp master )

Catalog # EH-GTS22

Catalog # EH-GTS22RM ( With built-in  
ramp master )

This large front loading kiln affords the artist plenty of room for annealing, manipulation and slumping work. Available in both top fire only or top and side fire configurations: GT22 and GTS22 respectively. Infinite switch control is standard. All elements independently operated. Inside dimensions are 22" wide x 13 1/8" long x 22" deep. 24 amps and 240 volts or 208 volts please specify.

### DYNOLIFT

Catalog # EH-DYNOLIFT

The DYNO-LIFT spring loaded lid lifting device is designed for use with EH-GTS23-9, EH-GTS23-13, EH-GTS2541 & EH-GTS2541-13. Prevents lid from crashing closed and makes opening less of a struggle. Please specify which kiln you are ordering for.

The ramp master controller is available as a built-in option on most kilns in the Evenheat line. The ramp master is also available as a remote unit for new and existing kilns ( see "ramp master Wall Mount" below ). Ask for the ramp master digital control when choosing your next Evenheat kiln.

### RAMPMASTER WALL MOUNT

Catalog # EH-WRM-1 ( 120v 20a )

Catalog # EH-WRM-2 ( 240v 20a )

Catalog # EH-WRM-3 ( 240v 30a )

Catalog # EH-WRM-5 ( 240v 50a )

Catalog # EH-WRM-6 ( 240v 60a )

The Ramp Master wall mount controller converts manually operated kilns into fully programmable, automatic units. Simply plug the existing manual kiln into the controller, program and fire. All operations are handled automatically. The Ramp Master features 8 programmable segments, ascending and descending ramps temperature soaks pause and segment skip features and much more. The Ramp Master wall mount can be used on most kilns. Please provide plug / receptacle configuration when ordering.

### Important Ordering Information

When ordering your evenheat glass kiln please provide us with the following information.

U.S. and Canada

1. Operating voltage \*

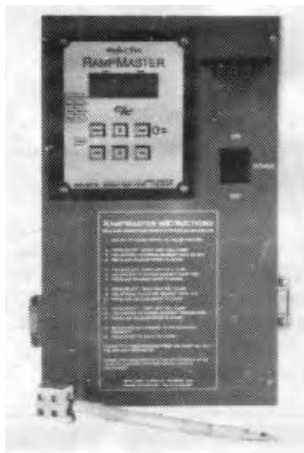

All other countries

1. Country where kiln is to be used

2. Operating voltage \*

3. Operating line frequency

\* Standard production models are designed for use on 120V AC and 240V AC single phase. Other voltage and phase configurations are available at additional charge.

## LID LIFTER

Catalog # EH-0158

Used for venting kilns safely. Useful for lifting the lid during the devitrification range. Hardwood handle. 12 1/2" overall length.

## PYROMETER

Catalog # EH-8060 *Analog*  
 Catalog # EH-8060D *Digital*

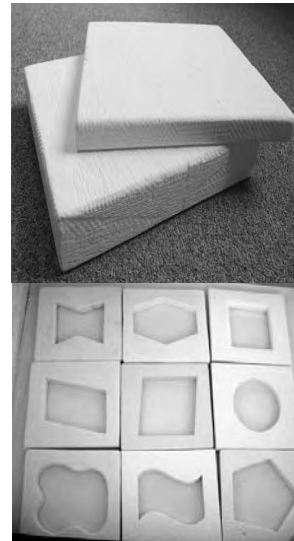

Indicates the temperature inside of the kiln. Enables you to know when to begin watching the glass closely and to make accurate firing records. Range is from 100°F to 2400°F + or - 1% of reading.

# KAISERLEE BOARD

Kaiserlee board is a very unique and versatile fusing material. It is ready to use, no pre-firing is needed. It is re-usable countless times without losing firmness. KLB does not absorb heat like other ceramic or stainless steel molds, dams or kiln shelves. It ensures even heat distribution and less stress on the glass and will cut down on annealing times. It is a rigid material that is extremely easy to cut or reshape. This material can be cut and shaped with tools laying around the workshop or kitchen. Custom casting molds can be created in just minutes with just a plastic spoon as a sculpting tool. Cut custom shaped molds quickly and easily with a pumpkin carving knife. Create 2 and 3 layered slumping molds by cutting a series of 2-3 rims in graduated sizes and stack them at different heights for layering. Make custom shaped dams for thick casted pieces. KLB can be used as a draper or as a slumper, the list of possibilities are countless. Kaiserlee board is available in 3 thicknesses 1", 1 1/2" & 2". The boards are 24" x 36" and are also available 18" x 24" and 12" x 18" For specific projects using Kaiserlee board check out **book #8818 (Introduction to glass fusing)** and **book #8993 (Fuse It)**.

## GLOW IN THE DARK FRIT & POWDER

Glow Glass glow in the dark frits and powders are non-toxic, non-radioactive and non-carcinogenic. The frits are available in COE 90 and COE 96. There are 5 colors available in COE 90 and 6 colors available in COE 96, both are packaged in 8 oz. jars. There are 7 colors of powder that are compatible with **all** types of glass and glass rods. The powders have a much more vibrant glow than do the frits, and can be used in flameworking as well as glass blowing. Powders are packaged in 4oz. plastic bags. Glow properties last up to 15 hours depending upon how long light is absorbed initially. This material can be charged with natural sunlight, blacklight or white light in just 5 to 10 minutes.

# HANG YOUR GLASS

Hang Your Glass is patent pending hardware that was designed especially for glass artist. This system is comprised of a stand-off which is adhered to the glass and is placed into the hanger bracket which is mounted to the wall. The stand-offs come in 4 different lengths to allow you to layer your installation to give more dimensionality to the artwork. The stand-offs are made with square necks that will lock into the hanger bracket and not rotate, this will allow you to mount the stand-off anywhere on the piece and hang it up without it wanting to rotate out of position. They also come with round necks which are necessary when you are using more than 1 stand-off on a piece. They are available in 3 diameters depending on the size and weight of the piece. There are 4 different lengths for layered installations. Specialty stand-offs designed for Bullseye double curve mold #B-8634 and a heavy duty hanger bracket for heavier and/or leveraged applications. The Hang Your Glass cabinet hardware is a great way to incorporate your glass art with your cabinet fixtures. The cabinet hardware is designed to be invisible behind the glass and is consistent with American and European industry standards. The Hang Your Glass adhesive is the strongest adhesive available to the glass artist. This adhesive is stronger than the glass, weather proof and very reliable. Templates guarantee placement during dry time and a special template is required for the double curve mold to insure placement so that final installation hangs parallel to the wall.

- Catalog #M5302 9 1/8" x 8 5/8" x 3/4" deep with 6 weaving crevices.
- Catalog #M5301 11 1/2" sq. x 3/4" deep with 8 weaving crevices.

## INSTRUCTIONS FOR USE OF INTERWEAVE MOLDS

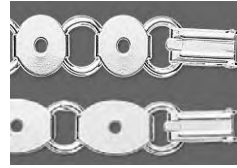

- 1- Cut strips of glass and lay across the humps on the mold.
- 2- Slump the glass strips
- 3- Line up wave strips so that when placed next to each other one wave is up and one wave is down creating a hole as you look through the edge. Pieces may be stacked edge to edge for tight weave or with separation for loose weave.
- 4- Cut new strips of glass just wide enough to slide through the hole that was created in step 3. When fired this will give the over and under appearance of a woven piece.

## TRIOLYSE 2-PART ADHESIVE

Catalog # 6014 14ml Activator & 10ml adhesive

Triolyse is a powerful, 2 part easy to use adhesive. Applies as thin as water and makes a great unbreakable bond that will hold metal to glass and glass to glass. Triolyse is curable with either the activator, UV light or even sunlight. Bonds in 30 seconds, full cure 4-6 hours.

# FUSING SUPPLIES

## HAIK BRUSH

Catalog # FS7818

2 3/8" Wide brush used for applying smooth even coats of shelf primer to shelves or molds.

## TERRY GLOVES

Catalog # FS7816

Comfortable gloves to use when working near hot objects.

## HOT GLOVES

Catalog # FS7817

Hot gloves are used when handling items just out of the kiln. max. temperature 400 degrees.

## THIN FIRE SHELF PAPER

Catalog # B-8210 20 1/2" x 20 1/2"  
 Catalog # B-8211 41" X 250' (Sold by the roll or by the foot)

## 3/32" SHELF PAPER

Catalog # FS7822

## 1/8" SHELF PAPER

Catalog # FS7822B

24" x 24" Fiber shelf paper for use as a fusing surface not requiring the need for shelf primer. Withstands temperatures up to 2300°F.

### SHELF PRIMER #5 BUCKET

Catalog # B-8220      *Gallon bucket*

Shelf Primer prevents glass from sticking to most ceramic or metal surfaces and prevents cracking as glass cools.

### GLASTAC

Catalog # B-8234      *4 oz. Bottle*

Catalog # B-8232      *32oz. Bottle*

Lightly tacks glass pieces in place prior to firing. Slow drying and pliability allows for readjustments as you work. Water soluble.

### MAGIC OUTLINING PEN

Catalog # MOP-F      *Fine point*

Catalog # MOP-R      *Regular point*

Outline, write, draw details with no-fire Color Magic Stains or fire-on glass enamals with the Magic Outlining Pen. Cleaning plunger included.

### STRESSOMETER

Catalog # FS7813

The stressometer is a polarized light which gives a visual indication of the amount of stress existing in two glasses which have been fused together. The stressometer includes a diffusing lens, two polarized lenses, complete instructions and battery.

### LIQUID STRINGER MEDIUM

Catalog # LSM (8oz)

LSM is organic, water soluble & clean burning. For use with glass powders, mix equal parts LSM to powder by volume for liquid stringer, and mix 1 part LSM to 2 parts powder to make glass clay.

### HOT LINE SPRAY A

Catalog # FS7824 (8oz)

A low melting glass suspended in a spray medium. Apply to protect before firing in order to assure against devitrification. Do not use this product on food service products contains lead!

### MASTER SUPER SPRAY

Catalog # FS7827 (8oz)  
Catalog # FS7827Q (32oz)

Prevents surface devitrification on kiln glass projects.  
\*Proven safe for food bearing surfaces.  
\*Can be used on iridescent coat and dichroic surfaces  
\*Will not discolor reds, oranges or other sensitive colors.

### GLASS FUSERS GLUE

Catalog # FS78751

Makes 32 fluid ounces. For holding glass layers together before fusing.  
\*Will not leave carbon spot residue.  
\*Slow setting  
\*Will not repel spray A.

### FREE

Catalog # GCFREE (4oz)

Dust lightly over sagger or slumper molds to allow the glass to move freely over the surface.

### GLASS SEPARATOR

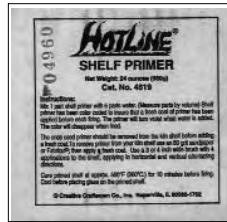

Catalog # GCGS (16oz)

Used on molds or kiln shelves to prevent glass from sticking can be used as kiln wash for 06/6 firing.

### SHELF PRIMER

Catalog # FS7819 (24oz)

Used on kiln shelves to prevent glass from sticking when firing

### FIBERMOLD HARDNER

Catalog # FS7850Q (32oz)

Fiber Mold hardener can be used with all fiber products as a rigidizer; air or oven dry. The hardener and fiber products will not act as a glue, but gain surface strength after firing to 1300 deg. F.

### FUSE MASTER - Clear Coat Overglaze

Catalog # FS7828Q (32oz)

Clear Coat Overglaze gives Kiln-fired glass a durable, glossy surface. Safe for food bearing applications. Using a soft brush or sprayer, apply a light coating to the surface of a piece of clean glass. Allow to dry, then fire to 1350f deg or above.

## SCONCE MOLDS & HARDWARE

These Sconce molds and hardware make any lighting job a snap. Both hardwares are UL approved and hardwired so that there is no cord dangling below the light fixture. The WSH-1 adjusts in width in case your finished piece doesn't quite match the hardware and allows you to use other molds. It fits standard bulbs as well as newer style fluorescent bulbs up to 75 watts. WSH-2 snaps onto the top and bottom edge of the glass piece and can fit any shape of glass that is made to the correct dimensions to fit. Due to the shallow depth between the bulb and the glass, this hardware is supplied with a candleabra style bulb receptacle that will allow bulbs up to 75 watts.

# ADJUSTABLE DISPLAY STANDS

These adjustable display stands make it easy to accommodate many different sizes of work without having to have a different display stand for each size of work. The easle stand is very versatile and will hold many sizes and shapes of finished work. The square stand comes in 2 sizes, both are very sturdy and will display your work beautifully and safely. The square stand will only hold pieces that are square or rectangular at the bottom where it is installed. The V-stands come in 2 sizes plus a wall mounted style. They are designed to hold square shapes set on end with the point down like a diamond.

## ADJUSTABLE EASLE DISPLAY STAND

Catalog # PS-2

Legs adjust from 3 1/2" to 7" long.  
Back rest adjusts from 4" to 7" tall.

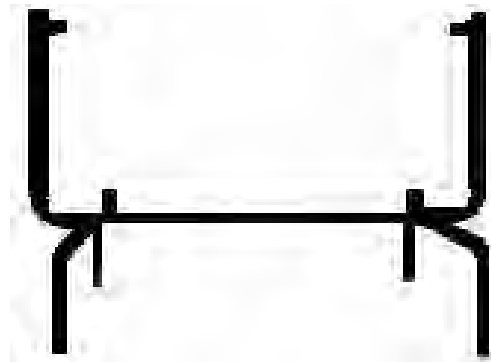

## ADJUSTABLE SQUARE DISPLAY STAND

Catalog # PS-3            Large Square Stand  
Catalog # PS-6            Small Square Stand

PS-3 Adjusts from 12 1/4" to 21 1/2" wide.  
Sides supports adjust from 6 1/2" to 11" tall.

PS-6 Adjust from 7 1/2" to 12 1/2" wide.  
Side supports adjust from 4" to 7" tall

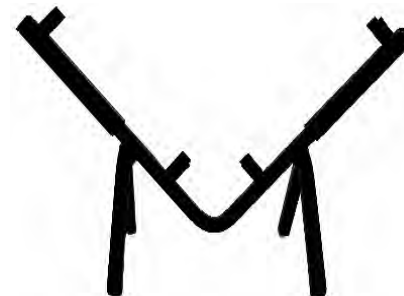

## ADJUSTABLE V DISPLAY STAND

Catalog # PS-4            Small V Stand  
Catalog # PS-5            Large V Stand

PS-4 Supports adjusts from 7" to 10" long.

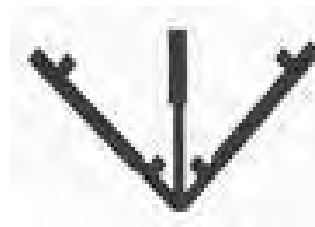

PS-6 Supports adjust from 9" to 13 1/2" long.

## ADJUSTABLE WALL V DISPLAY

Catalog # PS-7

PS-7 Supports adjusts from 7" to 10" long.

# MULTI-PENS FIRED PAINTS

MULTI-PENS are liquid enamel pens that fire between 1400-1550 degrees F, for use on glass, ceramic & metal. Easy to use, lead-free, non-toxic & dishwasher proof, each pen comes with a very fine metal application tip for drawing the paint out like a pen, but may also be applied with brushes. Available in 18 vibrant colors that can be mixed for shading or color changing. Packaged in 2oz. bottles.

MP-3168	Christmas Red 2oz.

# KILN FIRED PAINTS

Unique has moved to a new area with the release of a line of glass colors. We feel this product is exceptional in ease of application and stability. Pre-mixed and water soluble, these colors are bright and clean with a high gloss. Both transparent and opaque colors are available for use on many types of glass, on ceramic glazes. There are 4 matte colors and two outlining paints, a white and a black, which are also mattes. Thinned colors can be brushed, sponged, sprayed or applied with a pen. All colors should be mixed only within the mixing group that they are in. Thin colors to the consistency of milk, then "puddle" the color on. This will allow brush marks to level out, giving a smooth finish. They tend to settle somewhat in the jar and will have to be stirred before and during use.

Firing from cone 017 to cone 015 on glass. Most numbers hold their color to much higher temperature. The D series (reds) can be fired to cone 016 along with any of the other colors. Any reds purchased after January 1995 are new formulas and are no longer heat sensitive. These colors are not intended for use on surfaces that will come in contact with food or drink. Use with drape molds where color is on the outside surface will be acceptable for food containers.

Comes in 1 oz. jars.

# BULLSEYE CONFETTI

Confetti are paper-thin shards of blown glass. The color saturation and opalescence of these glasses is much greater than that of the sheet glass, but due to their extreme thinness they appear very light with an almost paper or film-like quality.

Confetti are designed for collage-like applications. Thin confetti when overlaid on other glasses are useful for shading, hazing, or other types of color blending.

Confetti are packaged in 4 oz jars.

# BULLSEYE STRINGERS & RODS

Stringers are threads of glass which have been pulled from remelted fusible bullseye sheet glass. As it is impractical to retest the threads after remelting, they are not labeled "Tested Compatible", but have had many years of success in fusing these stringers to tested compatible sheet glass.

In both 1mm and 2mm thickness, stringers are approximately 17 1/2" long and are packed in 3/4" diameter plastic tubes. There are approximately 140 1mm and 45 2mm stringers per tube. For 1mm stringers add (-07) to the end of the 4 digit color number and for 2mm add (-72). For rods add (-76).

# SYSTEM 96 CONFETTI

Confetti are paper-thin shards of blown glass. The color saturation and opalescence of these glasses is much greater than that of the sheet glass, but due to their extreme thinness they appear very light with an almost paper or film-like quality.

Confetti are designed for collage-like applications. Thin confetti when overlaid on other glasses are useful for shading, hazing, or other types of color blending.

Confetti are packaged in 4 oz jars.
